### **DETAILED ACTION**

This is the first Office Action for application number 10/728,674, Swivel Support Base Apparatus, filed on 12/5/03. Claims 1-12 are pending.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by United States Patent No. 6467746 to Paskiewicz.

The patent to Paskiewicz discloses a device (the vehicle as described by Col. 1 lines 18-39, which contains a computer display monitor) disposed on a frame (200), a swivel mechanism, including a foot (221), which supports the majority of a load on the frame, having a defined coefficient that enables the rotation of the frame and impedes transnational movement of the foot and a disk (212, 227) fixedly and detachably connected to the foot and secondary feet (230) designed to share the load on the frame, which are connected to the frame (200) and disposed in the location surrounding the swivel mechanism the secondary feet (230) having a lower frictional coefficient than the

foot, and an axle (224) in fixable and rotatable contact with the disk (212, 227) and secured to the frame with a screw head (226), and a spring (See Col. 7, lines 2-5) which surrounds the axle (224) and supports the frame
